BURRILL'S
Superior German Writing Ink!!

THIS chemical preparation originated from one of the most celebrated Chemists in Germany, and is superior to any other Writing Ink yet discovered. Its superiority is rendered from the fact that it will not gum up nor corrode steel pens; there is no sediment, it flows freely, and cannot be extracted by acid from paper, and its color will never change.

For sale by the barrel or smaller quantities, by
GEO. BURRILL, Keene, N. H.

Orders solicited.

Oct. 22, 1851.
